

Introducing Open Declare

Viewing and lodging
electoral transactions just
became so much easier.

How does it work?

Open Declare is a real-time donation and expense disclosure platform. Lodge returns, view maps and create reports online – for all levels of government and elections.

The on-boarding of political candidates and parties is simple. The process of lodging gifts, donations and expenses is efficient and user friendly.

Purpose-built from the ground up as an open, scalable and secure platform for all types of elections, Open Declare keeps all data secure and complies with electoral acts.

Real-time returns

View donations and expenses immediately after they are lodged.

Automatic reconciling

Incoming and outgoing transactions matched automatically.

Complete transparency

Easy access to election disclosure information for the public.

Maps

Visualise transaction information more easily via maps.

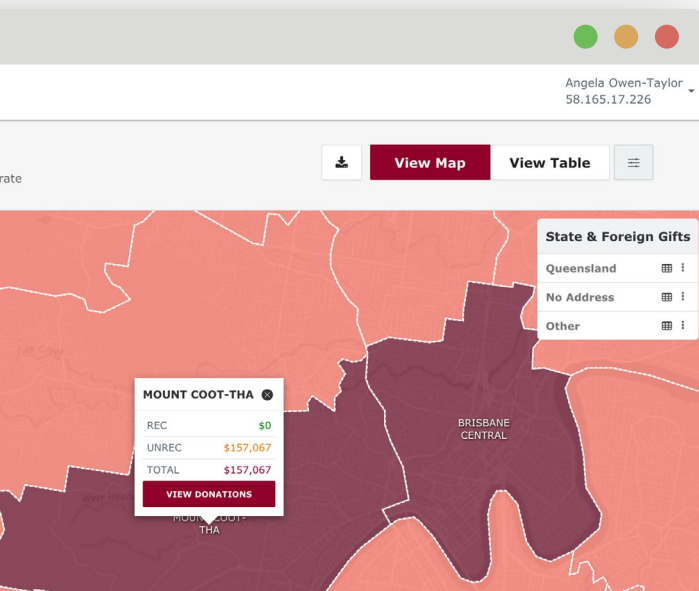

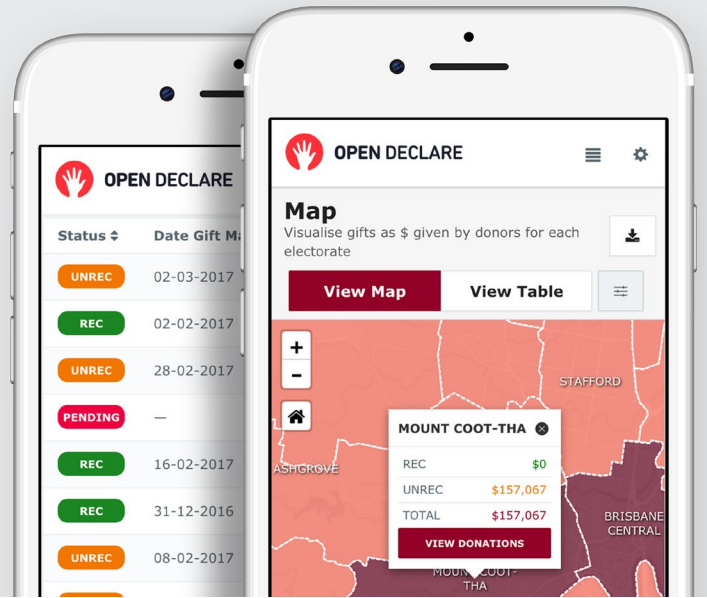

Reports

Explore, filter and download all transactions using a simple interface.

Run via mobile

Mobile support and a responsive design in Open Declare mean that the platform can be accessed at any time, from anywhere.

Explore real-time maps

Data from all reports is automatically processed and mapped, for viewing and exploring electoral transaction information in real time.

Manage processes centrally

Administrators maintain full control over transaction processes, from user management to full platform notifications settings.
